Aaron Manor Rehabilitation and Nursing Center Ranked #2 in New York State by Newsweek

Rochester, NY — November 14, 2025 — *Aaron Manor Rehabilitation and Nursing Center*, managed by Elemental Management Group, has been named the #2 medium-sized nursing home in New York State in *Newsweek's America's Best Nursing Homes 2026* ranking.

According to the U.S. Department of Health and Human Services, more than 15,000 Medicare- or Medicaid-certified nursing homes serve roughly 1.2 million residents across the country. To help guide families in choosing high-quality care, *Newsweek* and global data intelligence firm Statista evaluated facilities nationwide across four key pillars: performance data, peer recommendations, accreditations, and resident satisfaction.

This year's methodology placed additional emphasis on clinical quality metrics, underscoring the importance of measurable excellence in patient care and outcomes. Out of thousands of nursing homes nationwide, only 1,200 earned a spot on the 2026 list.

"We are honored to be recognized among the top nursing homes in New York," said Ryan Gilmartin, Administrator of Aaron Manor Rehabilitation and Nursing Center. "This ranking reflects the dedication of our staff, who continuously go above and beyond to make a difference in the lives of our residents. It's a true team effort - from our nurses and CNAs to our therapists, dining staff, and support teams - and I couldn't be prouder."

Aaron Manor's achievement not only highlights the dedication of its staff, but also reinforces Elemental Management Group's broader mission to provide exceptional care across its network of skilled nursing and assisted living communities throughout Central and Upstate New York.

"This is a proud moment for Aaron Manor and for our entire Elemental family," said Joe Murabito, Owner and Managing Partner of Elemental Management Group. "It's a testament to our belief that sustainable, compassionate care starts with strong teams, sound practices, and a culture centered on balance and well-being."
